APPENDIX A

[£] Referring now to Fig. 3, which illustrates the setup command exchange and release associated with the routine 100. This begins following the CALL BEGIN 86 (Fig. 2) with an ARQ request 102 in H.323 format from the DA server 46 to the gateway 44. The gateway 44 confirms with a responding ACF confirmation 104. The DA server 46 then issues a SETUP 106 to the gateway 44. The setup requests the channel signaling and an unrestricted 64 kbps data channel. The set passes the SETUP COMMAND 108 to the IP client telephone 20 and then confirms the setup with a CALL PROCEEDING COMMAND 110 back to the DA server 46.
